

CAN ID:

Identified for CAN Bus

↓ corresponding 11939 Fields

PGN:

• 18 bit from CAN ID

• composed by { ext data rge, data rge & PDU format PDU ext }

Source Address:

• Codeup in 11939 do list

• 1 byte address → 0 - 255 addresses possible

• Most important ones:

254 - Null Address

255 - GLOBAL alias broadcast
